Size

FRONT VIEW (FACE)

SIDE VIEW

Face and side views drawn to one scale (0.5 : 1 when printed at 100%). Part shapes simplified. All dimensions in mm; overall size ±5 mm. Full size table in the Technical Sheet.

Steps

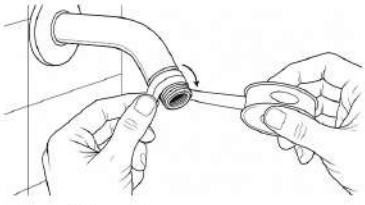

1 Close the water

Close the water to the shower.

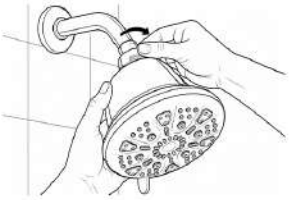

2 Remove the old head

Unscrew the old shower head from the arm.

3 Prepare the thread

Clean the arm thread and wrap Teflon tape on it.

4 Fit the Elegant

Screw the Elegant onto the arm by hand until firm. Do not use a spanner on the head.

5 Test for leaks

Open the water. Check the joint for drips and push the tab through the modes.

How to use

- To change the mode, push the tab on the edge of the spray face clockwise. Each click is the next mode: Power Mist, Rain, Intense + Power Mist, Rain + Intense, Intense, Rain + Massage or Massage.
- Turn the dial clockwise only; do not force it the other way.
- To aim the spray, swivel the head on its brass ball joint (360°).
- Hot water 60°C max.

Changing the cartridge

About every 6 months, or sooner if the flow drops. How long it lasts depends on your water quality and how much you use it.

1. Close the water.
2. Twist the old cartridge out.
3. Twist the new cartridge in until firm.
4. Open the water and let it run for 2 minutes to flush out carbon dust. Check for drips.

Troubleshooting

Problem	Cause	What to do
Water drips at a joint	Joint not tight	Close the water, tighten the joint by hand; for a bare thread, add Teflon tape
Flow has dropped	The cartridge is due for a change	Fit a new cartridge (about every 6 months)
Spray is uneven	White deposits in the nozzles	Rub the nozzles with your thumb under running water
